

AV integrator and boardroom solution

Teamline 5250

A premium meeting room solution that is native to the worlds of Skype for Business and Microsoft Teams.

The 5250 is precisely designed to slot into video conferencing suites that demand multiple screens, microphones, professional high-end cameras and full AV integration.

Teamline 5250 is perfect for all your large meeting spaces

Great quality and easy to use

The 5250 is a fully featured, enterprise room system with exceptional video and audio quality that offers an easy to use and familiar experience from desktop to meeting room. Registering directly with the Skype for Business server and/or Office 365, this is the only fully managed native solution that integrates with professional audio and video devices and third party control systems.

Features
